Glossary

1. Introduction

The “Glossary” document presents a list of terms in the medical field related to the project presented with accompanying definitions.

2. Glossary

| Term | Definition and Information | Format | Validation Rules |
|----------------------------|--|--------|------------------|
| health system | the organization of people, institutions, and resources that deliver health care services to meet the health needs of target populations | | |
| database | a comprehensive collection of related data organized for convenient access, generally in a computer | | |
| GUI | graphical user interface | | |
| design pattern | a general, reusable solution to a commonly occurring problem within a given context in software design | | |
| architectural pattern | a general, reusable solution to a commonly occurring problem in software architecture within a given context | | |
| non-functional requirement | a requirement that specifies criteria that can be used to judge the operation of a system, rather than specific behaviors | | |
| use-case model | a list of actions or event steps typically defining the interactions between a role and a system to achieve a goal | | |
| stakeholder | a person or group that has an investment, share, or interest in something, as a business or industry | | |
